

## No Clean Flux Pen

MODEL NO. : 2507 - N (11.5 ML)

- No clean flux easy to apply
- No dirty table
- Easy apply high Precision Application
- Flux is resin and halide free.
- Provide optimum wetting on wide range of surfaces.
- Excellent wetting ability.
- Excellent for poor solder ability surfaces.
- Pen meets IPC standard 7711 and ANSI J Standard 001C for circuit board repair and rework.

Tech Spray, USA

## Conductive Pen

MODEL NO. : 2505 - N (4.89 ML)

- Fast dry silver Ink design to make quick conductive traces.
- Repair traces link components make smooth jumpers.
- Pen meets IPC standard 7711 and ANSI J Standard 001C for circuit board repair and rework.

From: TechSpray, USA

## Overcoat Pen

MODEL NO. : 2509 - GN (5 ML)

- Insulate traces against high voltage arcing
- Provide protection from moisture and fungus.
- Precision application suitability.
- Pen meets IPC standard 7711 and ANSI J Standard 001C for circuit board repair and rework.

From: TechSpray, USA

## Conformal Coating Remover

MODEL NO. : 2510 - N (10 ML)

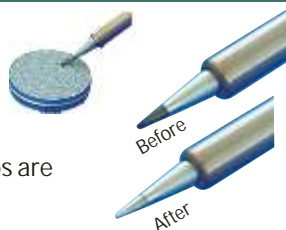

- Quick removal of conformal coating like acrylic, urethane and silicon type.
- Non-corrosive.
- Evaporate quickly.
- Pen meets IPC standard 7711 and ANSI J Standard 001C for circuit board repair and rework.

From: TechSpray, USA

## TIP REFRESHER

MODEL NO. : BS-2

- Remove the oxides on tip & restore the wetting capability on the tip.
- One can use tip for longer time.
- Very useful in lead free process as tips are getting oxide fast.

?From :Goot Japan

## Dispenser Model AT-180SD

ESD Safe

Solvent dispenser ESD safe with steel less steel pump protect against cross contamination by keeping fluid from returning to dispenser. output of liquid is restricted to spill on worktable using cap type design

From: AT

## ESD Safe Refillable Flux Pen BON 102

- ESD Safe and Refillable ( use Flux of your choice)
- Extra Brush available. • Workout much economical for user.
- Flux easy to apply • No dirty table • Easy apply for high Precision Application • No extra flux on work job.

No Clean Rohs VOC FREE Flux also supported by us in 1 Ltr Packing of Interflux.

## NEEDLE FLUX DISPENSERS From Plato, USA

- Stainless Steel Replacement Needles
- UNIQUE, NO LEAK DESIGN!
- MEETS ANSI (J-STD-001B)
- Plato new POS-A-LOC leak proof liquid dispensers offer a convenient way to dispense precise amounts of a variety of liquids without dripping, spilling or Waste.
- ESD Safe NO LEAK Plato Flux Bottles have all the features of our standard flux bottles, and meet the requirements of ANSI (J-STD-001B).
- FD-21 - 2 oz. dispenser bottle with .010" (.25mm) needle.
- SF-01-2 oz. ESD Safe, dispenser bottle with .010" (.25mm) needle.

## Brush Scrub Bottle

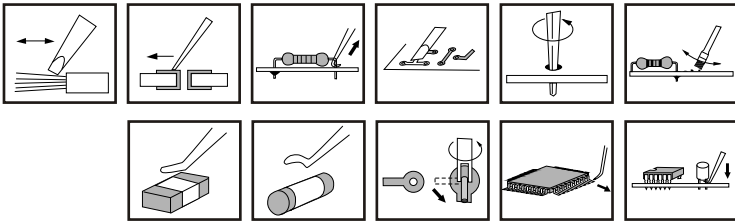

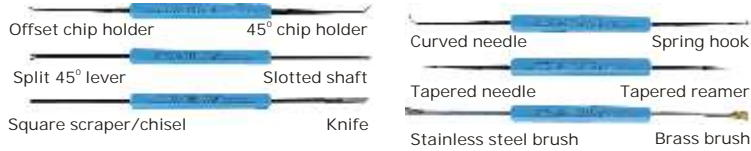

- Handy 2 oz. (59ml) polyethylene solvent dispenser with scrub brush provides an inexpensive and safe method to spot clean PCB assemblies.
- SB-2N - 2 oz. bottle with nylon bristles that have medium stiffness for general flux Removal.
- Durable and works well for flux removal and general cleaning.
- Combination of static dissipative jacket and natural material meets ANSI (J-STD-001B).

## Solder Assist

From: Goot Japan

### SOLDER ASSIST (6 TOOLS PER SET) MODEL SA-10

## Desoldering Wick

### MODEL NO. : CP - SERIES

Cleaning SMD component surface before Placing new component. Desoldering PTH components Bridge removing excess solder removing. Manufactured in Japan to high quality standards. Individually sealed packaging Non-chlorine, negligible halogen content, No-Clean RMA flux. Low cost Greater heat transfer from soldering iron tip through only one layer of copper braid. Reduced damage to the PCB surface. Since heat transfers faster to the surface (through only one layer of braid), solder removal, in small areas, can be accomplished at lower soldering iron temperatures. Much less residue left on the work surface! Less flux used in processing—more friendly on the environment Great for removing solder from tiny areas or in fiddly positions. Very suitable for lead free soldering applications. The higher melting point of lead free alloys often means that users must operate at high temperatures to heat the solder through the desoldering braid. Since the F-Type braid is thinner, heat transfers faster, melting the solder faster. Very suitable for Bridge Repair temperature.

From : goot Japan

## Solder Wire No Clean

- Alloy 63/37 & **LEAD FREE**
- Deferent dia available
- Solder Meet QQ-S-571 Quality
- Flux Meet Bell core and IPC Standard
- Provide Fast wetting
- Low smoke generation
- Long solder tip life
- Perfect even for SMT Application

## SMD/BGA Repair Flux ( gel form) IF-8300

We have many other type fluxes alcohol based too for commercial application to military grade application, **Please contact us for your requirements.** This is completely halogen free and guarantee long term reliability and good solderability capabilities Withstand high temperature and evaporate on sufficient heat. The minimum transparent residue need not to clean it can be applied with help of Brush, dispensing syringe and can be liquefied as per utility using thinner in 30% ratio. Depending upon application. Flux is tacky and can hold SMD component. Standard Packing is 100 gm Jar Packing. Contact back for TD, MSDS and test reports.

## Solder Reel Holder

### MODEL NO. : ST-51

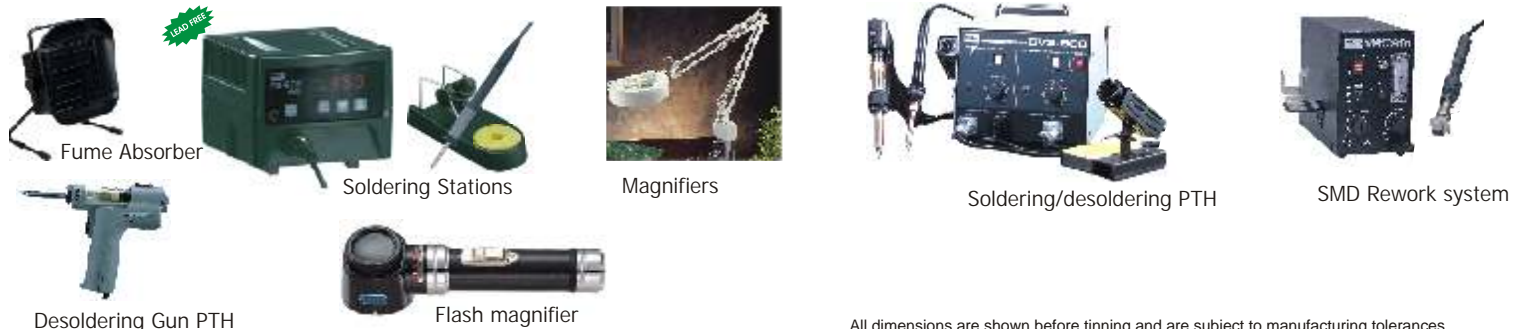

Maximum load of 1kg. Heavy base ensures extra stability. Guide spring to avoid solder tangle.\*Solder is not included. Spindle diameter : Ø16mm  
From :Goot Japan

#### Dimension

W (93) X D (120) X H (110) mm,  
Wt. 650 gm.

## Other Useful Products

All dimensions are shown before tinning and are subject to manufacturing tolerances.
